Canadian Fertilizer Quality Assurance Report

Rapport canadien de vérification de la qualité des engrais

1999

PLANT RATINGS

NOTATIONS OBTENUE

The Canadian Food Inspection Agency takes no responsibility for the accuracy of the information contained in the Canadian Fertilizer Quality Assurance Report. Nothing in this report shall be deemed to constitute any representation or guarantee by the Canadian Food Inspection Agency whatsoever.

L'Agence canadienne d'inspection des aliments décline toute responsabilité concernant l'exactitude des renseignements retrouvés au rapport intitulé Rapport canadien de vérification de la qualité des engrais. Aucune partie de ce rapport ne doit être perçue comme représentant une garantie quelconque de son contenu par l'Agence canadienne d'inspection des aliments. L'Agence canadienne d'inspection des aliments n'assume pas la responsabilité de l'usage que l'on pourrait faire des renseignements y retrouvés.

Note: Effective April 1, 1997, the former Food Production and Inspection Branch of Agriculture and Agri-Food Canada is now known as the Canadian Food Inspection Agency.

Nota: Depuis le 1er avril 1997, l'ancienne direction générale de l'inspection et de la production des aliments d'Agriculture et Agroalimentaire Canada se retrouve au sein de l'Agence canadienne d'inspection des aliments.

Canadian Fertilizer Quality Assurance Program

The Canadian Fertilizer Quality Assurance Program (CFQAP) is a national quality control program that has been designed by the Canadian Food Inspection Agency and the fertilizer industry. Each fertilizer manufacturer/blender rated in this publication has implemented a voluntary quality control program in their own plant. The Canadian Food Inspection Agency recognizes the efforts and commitment of these companies to manufacturing high quality fertilizers.

1999 is the tenth year in which manufacturers/blenders have been rated in the Canadian Fertilizer Quality Assurance Report*. The plant ratings** reported here are based on the samples taken under this program. In addition to the samples taken by the companies (459 companies submitted 3273 sample results), Canadian Food Inspection Agency inspectors took samples (738 samples from 496 companies) from many of these companies. These sample results have been combined with the company sample results to give the plant rating. On an industry wide basis it compares favorably with past performances.

This report is divided into 2 main sections. These are:

- 1) Ratings for blends, and
- 2) Ratings for materials (basic ingredients used to manufacture blends).

*The scope of the CFQAP does not currently include anhydrous ammonia producers.

** (See Page vi for a description of the Rating System.)

If you have any questions or comments regarding this report, please contact Peter Ferguson at:

Programme canadien de vérification de la qualité des engrais

Le Programme canadien de vérification de la qualité des engrais (PCVQE) est un programme national de contrôle de la qualité mis sur pied par l'Agence canadienne d'inspection des aliments et l'industrie des engrais. Chaque fabricant ou établissement de mélange d'engrais dont la qualité des engrais est évaluée dans la présente publication a déjà établi volontairement ses critères de vérification de la qualité dans son propre établissement. L'Agence canadienne d'inspection des aliments reconnaît les efforts que déploient ces compagnies pour produire des engrais de qualité supérieure.

C'est la dixième année en 1999 que les fabricants se voient attribuer une notation dans le Rapport canadien de vérification de la qualité des engrais*. Les notations ** obtenues par les différentes compagnies sont basées sur les échantillons prélevés dans le cadre de ce programme. En plus des échantillons prélevés par les compagnies (459 compagnies ont soumis 3273 échantillons) les inspecteurs de l'Agence canadienne d'inspection des aliments ont prélevé des échantillons (738 échantillons de 496 compagnies) de nombreuses compagnies. Les résultats obtenus par les deux groupes (compagnies et l'Agence canadienne d'inspection des aliments) ont été regroupés pour donner une notation globale de l'établissement. Basé sur l'ensemble de l'industrie, ils se comparent favorablement au rendement antérieur.

Ce rapport est divisé en 2 sections :

- 1) Notation pour les mélanges, et
- 2) Notation pour les engrais de base (ingrédients de base utilisés dans la production des mélanges).

*À l'heure actuelle, le PCVQE ne s'applique pas aux fabricants d'ammoniac anhydre.

** (Voir page vii pour une description du système de notation.)

The Canadian Fertilizer Quality Assurance Program (CFQAP)

Key Points

1. Over 96% of the fertilizer blenders/manufacturers in Canada have signed up as members in the CFQAP.
2. Each participant submits at least the minimum number of samples required based on a statistically valid sampling plan.
3. To obtain accurate results, samples must be taken according to the Canadian Food Inspection Agency's official sampling instructions.
4. Samples are analyzed by a laboratory accredited and monitored by the Canadian Food Inspection Agency.
5. The Canadian Food Inspection Agency receives a copy of all results from official CFQAP samples directly from the accredited laboratory. The laboratory simultaneously sends a copy of the results to the company concerned.
6. The Canadian Food Inspection Agency receives results by November 30 of each year.
7. Prior to publication, the Canadian Food Inspection Agency verifies the accuracy of all results of official samples with the company submitting the samples.
8. A plant rating is established for each blender/manufacturer that has submitted a sufficient number of samples*.

MINIMUM SAMPLING LEVEL FOR BLENDED PRODUCTS

ANNUAL PRODUCTION (TONNES/YEAR)	SAMPLES/YEAR
Small (0 to 600 t/yr)	3
Medium (601 - 4800 t/yr)	5
Large (over 4800 t/yr)	8

MINIMUM SAMPLING LEVEL FOR BASIC MATERIALS

ANNUAL PRODUCTION (TONNES/YEAR)	SAMPLES/YEAR
Small (0 to 50,000 t/yr)	3
Medium (50,001 - 120,000 t/yr)	5
Large (over 120,000 t/yr)	8

9. In March of each year all plant ratings are published and made widely available. These ratings are based on samples taken in the previous year.
10. All those not submitting samples or submitting an insufficient number of samples are identified in the publication.

***N.B. CANADIAN FOOD INSPECTION AGENCY SAMPLES DO NOT COUNT TOWARDS THE MINIMUM NUMBER REQUIRED.**

Programme canadien de vérification de la qualité des engrais (PCVQE)

Points clés

1. Au delà de 96 % des fabricants et des établissements de mélange d'engrais au Canada ont accepté de participer au P.C.V.Q.E..
2. Chaque participant doit soumettre au moins le nombre minimal d'échantillons requis basé sur un plan d'échantillonnage qui est statistiquement valable.
3. Pour obtenir des résultats qui sont précis, les échantillons doivent être prélevés selon les méthodes d'échantillonnage officielles de l'Agence canadienne d'inspection des aliments.
4. Les échantillons sont analysés par un laboratoire accrédité et contrôlé par l'Agence canadienne d'inspection des aliments.
5. L'Agence canadienne d'inspection des aliments reçoit des laboratoires accrédités une copie de tous les résultats d'échantillons qui ont été prélevés dans le cadre du P.C.V.Q.E. Une copie des résultats est également envoyée par le laboratoire à l'établissement en question.
6. L'Agence canadienne d'inspection des aliments reçoit les résultats avant le 30 novembre de chaque année.
7. Avant la publication, l'Agence canadienne d'inspection des aliments vérifie l'exactitude de tous les résultats d'échantillons officiels qui ont été soumis dans le cadre du programme auprès de l'établissement qui a soumis les échantillons.
8. Une notation est établie pour chaque fabricant et/ou établissement de mélange d'engrais qui a soumis le nombre suffisant d'échantillons.*

TAUX D'ÉCHANTILLONNAGE MINIMAL - MÉLANGES

VOLUME DE PRODUCTION ANNUEL(TONNES PAR ANNÉE)	ÉCHANTILLONS PAR ANNÉE
Petit (Jusqu'à 600 t/an)	3
Moyen (601-4 800 t/an)	5
Gros (Plus de 4 800 t/an)	8

TAUX D'ÉCHANTILLONNAGE MINIMAL - MATIÈRES DE BASE

VOLUME DE PRODUCTION ANNUEL (TONNES PAR ANNÉE)	ÉCH' ANTILLONS PAR ANNÉE
Petit (0 à 50 000 t/an)	3
Moyen (50 001-120 000 t/an)	5
Gros (Plus de 120 000 t/an)	8

9. Au mois de mars de chaque année, tous les résultats sont publiés et disponibles. Ces résultats sont basés sur les échantillons prélevés l'année précédente.
10. Le nom des fabricants ou des établissements qui n'ont pas soumis d'échantillons ou qui n'ont pas soumis le nombre suffisant d'échantillons paraît dans la publication.

***N.B. LES ÉCHANTILLONS DE L'AGENCE CANADIENNE D'INSPECTION DES ALIMENTS NE SERONT PAS INCLUS DANS LE NOMBRE MINIMAL D'ÉCHANTILLONS REQUIS.**

Rating System

The results for each location which has sample results are summarized according to a plant rating system consisting of the following categories: AAA, AA, A, B, C and F.

Blended Fertilizers

Individual plant ratings of blended material are based on the commercial value (measured by the Combined Nutrient Level (CNL)) and the accuracy of the ratio of plant nutrients (measured by the Ratio Compliance Index (RCI)). The product of these two factors is known as the Quality Control Index (QCI) and the average is used to determine the plant's standing.

Plant Rating Intervals

The Plant Rating Intervals for the QCI are as follows:

Ratings	QCI Range
AAA	100.0 - 99.51
AA	99.5 - 98.51
A	98.5 - 96.51
B	96.5 - 92.51
C	92.5 - 84.51
F	<84.50

Significance of the Letter Ratings

The letter ratings A - AAA indicates that the blender is providing good commercial value (i.e., ingredients) and a well blended product. The higher the letter rating the more consistent the blender is in providing a good quality fertilizer.

Fertilizer Materials

Fertilizer materials are assessed according to current analytical tolerances. Individual samples are designated as being in compliance if the results of analysis do not exceed the tolerances which accommodate unavoidable variation associated with sampling and analysis.

Plant Rating:

AAA	95.1% or more of samples in compliance
AA	85.1-95% of samples in compliance
A	75.1-85% of samples in compliance
B	65.1-75% of samples in compliance
C	50.1-65% of samples in compliance
F	less than 50% of samples in compliance

Système de notation

Les résultats pour chaque établissement sont publiés selon un système de notation utilisant les catégories suivantes : AAA, AA, A, B, C, et F.

Engrais mélangés

Le système de notation pour chaque établissement manipulant des engrais mélangés est basé sur la valeur commerciale de l'engrais (mesurée par le principe nutritif combiné (CNL) et l'exactitude du rapport entre les éléments nutritifs (mesuré par l'indice de conformité au rapport nutritif (RCI)). Le produit de ces deux facteurs est connu comme l'indice de contrôle de la qualité (QCI) et la moyenne des résultats obtenus sert à déterminer la note de l'établissement.

Intervalles du système de notation :

Les intervalles du système de notation pour le QCI sont :

Notation	Intervalles
AAA	100,0 - 99,51
AA	99,5 - 98,51
A	98,5 - 96,51
B	96,5 - 92,51
C	92,5 - 84,51
F	<84,50

Signification du système de notation

La catégorie alphabétique A-AAA indique que l'établissement manipulant des engrais mélangés fabrique un produit de haute valeur commerciale (c.-à-d. ingrédients) et un produit qui est bien mélangé. Plus la notation est élevée, meilleur est l'engrais fabriqué par l'établissement.

Engrais de base

Les résultats d'analyse pour les ingrédient simples sont évalués selon les tolérances analytiques. Les échantillons seront conformes si les résultats (en tenant compte des variations inévitables associées à l'échantillonnage et à l'analyse) ne dépassent pas les tolérances permises.

Système d'évaluation :

AAA	Conformité de 95,1 % et plus des échantillons
AA	Conformité de 85,1 à 95 % des échantillons
A	Conformité de 75,1 à 85 % des échantillons
B	Conformité de 65,1 à 75 % des échantillons
C	Conformité de 50,1 à 65 % des échantillons
F	Conformité de 50,1 % et moins des échantillons
